FEATURED OPPORTUNITY: SCC ENGINEERING TEAMS

The Student Competition Center (SCC) houses seven student engineering competition teams. The SCC is a 17,000-square-foot facility located on 14th Street near Hemphill, which fosters innovation among hundreds of students who design, build, and compete with vehicles and robots. The teams recruit students every year.

1. **Robojackets** is Georgia Tech's premiere robotics club, encompassing five teams: BattleBots, Robonav, RoboCup, RoboRacing, and RoboWrestling. These teams compete in several collegiate competitions, volunteer at local robotics events, and mentor high school teams. RoboNav in particular develops autonomous robots to navigate a Mars-style course for the University Rover Challenge in Hanksville, Utah. Go to robojackets.org for more information.

2. **GT Motor Sports** build an internal combustion engine race car to compete in the Formula SAE competitions every year against 120 teams.

3. **GT Off Road** designs and constructs off-road vehicles to compete in the Baja SAE competition every year.

4. **GT Solar Racing** builds solar-powered race cars for track and cross-country competitions.

5. **EcoCAR** is currently competing among 13 schools to redesign a 2023 Cadillac to maximize energy efficiency and advance automation.

6. **HyTech Racing** develops a new completely electric race car annually to compete in the Formula SAE competitions across the country.

7. **Wreck Racing** designs and fabricates cars for the annual Motorsports challenge.
